PhD Studentship: Fenflux: The short term climate response

Fenflux: The short term climate response of carbon dioxide and water fluxes from a regenerating peatland
University of Leicester - Department of Geography

The Department of Geography, University of Leicester invites applications for a funded 3-year PhD Studentship

Fenflux: The short term climate response of carbon dioxide and water fluxes from a regenerating peatland

The studentship will cover tuition fees (at the UK/EU rate only) and include a stipend of £9,500 each year over three years. The successful candidate will also receive a Research Training Support Grant worth £1,000 each year.

For further details about the studentship, entry requirements and to apply please go to

http://www2.le.ac.uk/departments/gradschool/finance/funding/scholarships/physical-geography

The closing date for applications is 31 May 2011.

The anticipated starting date of the studentship is 3 October 2011. To avoid disappointment, applicants are advised to apply as early as possible.

For informal enquiries, further information, and advice on applications, please contact Dr Jörg Kaduk, email jk61@le.ac.uk, tel. +44 (0) 116 223 1777
