Resource person for the training on post mining reclamation at SEAMEO-BIOTROP Bogor (1 February 2013)

Silvicultural aspects on post mining reclamation were discussed during the training conducted at SEAMEO BIOTROP, Bogor. As one of the resource persons, I presented a lecture on the above mentioned subject that were attended by postgard students, mine officers and enviromental staff of mining companies. Numerous lessons learned and best practices on revegetation techniques were presented in particular interesting cases from gold, nickel and coal minings. Several innovations on bio-fertilizers from IPB were also exposed to the participants such as Probio, Mycofer and B&O Fer (@izs)
