Attending General Lecture on Observing Indonesian Air Pollution from Space

General Lecture on Observing Indonesian Air Pollution from Space was held on 24 March 2018 at Faculty of Forestry IPB. It’s interesting talk which was delivered by Dr Bryan Duncan from NASA’s Gooddard Space Flight Center USA. Find more about Dr Bryan at here: https://acd-ext.gsfc.nasa.gov/People/Duncan/.

NASA has introduced the satellite Orbiting Carbon Observatory 2 (OCO-2). OCO-2 is an American environmental science satellite which launched on 2 July 2014 which has a mission in observing atmospheric CO2.
