Beautiful Countries

This is a list of the most original of which are specific for its natural beauty, some demographic characteristics, and some of the tourist features.

A country with 3 million lakes - Canada
In Canada, there are more than 60 percent of lakes in the world, they are so numerous that their exact number is unknown. In some regions, for every 100 square meters, km for more than 30 lakes.

The country in which more than 17,500 islands - Indonesia
Indonesia consists of more than 17,500 islands with a total coastline of 81,350 km. Approximately 6,000 of the islands are inhabited. The largest islands - Java, Sumatra, Borneo, Sulawesi, Bali, Lombok and Flores. Indonesia contains 10-15 percent of coral reefs in the world.
Country Desert - Libya
Libya - a country with the highest percentage of the Desert (99%). Libyan Desert, which covers most of Libya, is one of the driest places on Earth. In some areas can go decades without rain, and even in the high rainfall are rare, once in 5-10 years.
The country with the lowest population densities - Mongolia

The country with the lowest population density in the world is Mongolia, population density, about 4.4 people per square mile (1.7 pers. / Km). In Mongolia, the 2.5 million people occupy more than 600,000 square miles of land. Most of this population lives in urban areas as the development in the vast deserts of Mongolia grassland is difficult, particularly because of the drought and dust storms, resulting in some parts of the country almost as well as desert and in time of Genghis Khan.
Country in the jungle - Suriname

The forest area is 14.8 million hectares (57 000 square miles), representing 91% of the total land area of Suriname (16.3 million hectares, or 63 000 square miles). The extensive forest of Suriname and the low population, about 400 thousand in the capital and coastal cities, give him one of the lowest rates of deforestation in the world. Only 5 percent of the population lives in tropical forests, it is indigenous tribes and six blacks - descendants of runaway slaves who recreated forest communities centuries ago and today retain their traditional West African style.
Dying is the country - Ukraine

Country with the highest fertility decline is Ukraine, with the natural population decline 0.8% each year. Ukraine is expected to lose 28% of its population in 2050 (from 46.8 million today to 33.4 million in 2050).
The country below sea level - the Netherlands

Half of the Netherlands lies below sea level. Live below sea level to more than 60 percent of the population of 15.8 million. Only in the area south of the Netherlands increased to 30 yards or more.
The most unfrequented country - Tuvalu
This is one of the smallest countries in the world. Tuvalu is located halfway between Australia and Hawaii, and is projected to be the first country to disappear under water when global warming will raise sea levels high enough. In addition, here it is very difficult and very expensive to get flights out of Fiji. Tuvalu visited a total of 1,100 tourists a year.
Country-continent - Australia

Australia is the only country in the world, which embraces the whole continent, in any other continent has more than one country. This is the only country which is a continent and a continent which is the country. This is the sixth largest country in the world, with a total area of 7686850 sq km (2967909 sq. miles), it is a little less than 48 U.S. states and in 31.5 times more than the United Kingdom.
