When author writing this page, the author still confuse and know nothing about dspace, but you can search description about dspace in it's website or in en.wikipedia.org Here is some of sentences which explain about dspace:

DSpace is an open source software package that provides the tools for management of digital assets, and is commonly used as the basis for an institutional repository. It supports a wide variety of data, including books, theses, 3D digital scans of objects, photographs, film, video, research data sets and other forms of content. The data is arranged as community collections of items, which bundle bitstreams together.

DSpace is also intended as a platform for digital preservation activities. Since its release in 2002, as a product of the HP-MIT Alliance, it has been installed and is in production at over 240 institutions around the globe [1], from large universities to small higher education colleges, cultural organizations, and research centers. It is shared under a BSD licence, which enables users to customize or extend the software as needed. (en.wikipedia.org)
